

Please do not allow the LPFMs to take priority over the FM translator services. I have come to enjoy and depend on stations such as 'AIR 1' that serve local communities by providing family-friendly programming and supporting wholesome values. The absence of these FM translator stations would be devastating on local communities because they would probably be replaced with stations that do not support wholesome values. In other words, the trash that they would broadcast would not be beneficial to local communities. Stations such as "AIR 1" serves the public interest by broadcasting encouraging programming through music and talk shows. There is nothing but good news coming through the air waves of "AIR 1", and to not have the signal from stations such as these would devastat our local communities. Please do not allow the LPFM stations to take priority over these beneficial FM translator services.

Thank you,

Mark
